

Portage Pediatric Dentistry Additional Questionnaire

1. Describe your child's at home dental care:

2. In what ways is your child able to communicate?

3. Are there any words/phrases/symbols/signs that are helpful to your child?

4. What sensitivities does your child have in terms of sounds, lighting, tastes, textures, and smells?

5. Please provide any additional information that may help us to prepare for a successful dental experience.

A Trip to

The day of our trip to the dentist, I will wake up and eat breakfast like I always do.

Afterwards we will brush my teeth, get dressed, and get into the car to drive to the dentist office.

The dentist office has lots of nice people there that will say

hello to me and smile at me because they are nice and want me to be happy.

I will wait in one of the playrooms with my Mommy or Daddy until my name is called.

I will keep my body safe by reading a book, playing on my phone, or sitting on my parent's lap.

They will call my name when it is my turn to sit in a big chair.

If this is my first visit, I may be able to sit on my parent's lap. I might also get to wear some special sunglasses! Mom and Dad can also sit next to me.

There may be a buzzing noise from the teeth cleaner, if I get nervous, I can squeeze my mommy or daddy's hand and they will ask the dentist's helper to stop so I can take a break. Can you find the thing that tickles your teeth?

They may even take some COOL pictures of my teeth using an x-ray machine. I will wear a special apron. It may feel a little heavy.

Once all my teeth are clean, Dr. Jody will count my teeth.

NOW MY TEETH ARE CLEAN!

I did a good job and can get a prize.

Mommy and Daddy are happy!

The Dentist is happy and my teeth are happy!
